DESCRIPTION: Suitable for use on rotary drum sanders, including: Hire Tech HT8 and Clarke EZ8.

MACHINE SUITABILITY: Rotary drum sanders, including: Hire Tech HT8 and Clarke EZ8.

STANDARDS:

- EN13743: European standard that regulates the safety requirements for coated abrasive products. (sanding sheets and discs.)

USER TIPS:

- To reduce the risk of damaging discs, ensure that any protruding nails are hammered home or removed, and any split or damaged boards are repaired.
- For the best results, start with a coarse grit i.e. P24, and then a medium grit (P60 or P80), finally using P120 to achieve a clean and smooth finish.
- Ensure that the sheet is fitted tightly to the drum and the clamping bar is fully tightened.
