

P4-C

SPEC SHEET

DESCRIPTION: Developed with the utmost understanding of aggregates being used in the manufacture of British building materials, the P4-C is durable, fast cutting and long lasting. It can be used on all popular UK building materials and concrete products such as reinforced concrete, concrete pavements, concrete slabs, concrete roof tiles, bricks and blocks.

MACHINE SUITABILITY: Angle grinders, wall chasers, hand held saws, table saws and floor saws.

STANDARDS:

- EN13236: European Standard that regulates the safety requirements for super abrasive (diamond) products..

DIAMOND BLADE TIPS:

- Make certain the blade is suitable for the material before cutting.
- Guide the blade straight into the material.
- Do not use unnecessary pressure, the weight of the machine is sufficient.
- Carry out a slight forwards and backwards pendulum movement when cutting
- If cutting speed reduces you can re-sharpen (dress) diamond segments by making several passes into a highly abrasive material such as a 3-Newton concrete or cinder (breeze) block.

PACKAGING DETAILS:

Full colour corrugated cardboard box.
