DESCRIPTION: The P5-STEEL TCT blades are designed with an anti-kickback tooth to offer a smooth and fast cut through materials such as aluminium, steel profiles, sheet metals and construction steel.

FEATURES: Super thin, cold cut, anti-kickback design.

MACHINE SUITABILITY: Metal cutting hand held saws such as the Makita BCS550.

USER TIPS:

- Ensure that the cutting depth of the machine is set correctly for the material being cut
- Do not force the cut. Let the blade and machine do the work
- Always ensure that the blade is suitable for your machine type. Using a blade designed for another machine type could be unsafe.
- Make certain that the blade is suitable for the material being cut
- The higher the tooth count, the cleaner the cut and the lower the tooth count, the faster the cut.
